My Bedroom

My bedroom is my favorite room in my house. I enjoy my bedroom because it describes me. The things that describe me the most in my room are the wall colors, bedroom suit, and the decorations. Over the years, my room has changed from being a "kid" room to being a "teenage" room. When I was younger my mom decorated my room. When I was younger, I could not wait until I was older so that I could decorate my room however I wanted. When I was younger I had to share a bedroom with my sister. I finally moved into my own room when my brother moved out. This seemed like one of the greatest days of my life. The smell of my room makes me think of the spring time when all of the flowers are blooming. When I enter my room I hear my radio, which reminds me of a day of listening to music and hanging out with friends.

My walls are as chocolate as a Hershey bar. The reason that I chose this color brown for my room is that it matched a lot of colors and it is unusual for people to have a chocolate brown room. I also like this color because it is easy to match things with. When I was younger my bedroom was very girly and brightly painted. My wall color was yellow before we painted it.

I have a wooden bedroom suit. I have a queen size bed, a nightstand, and two dressers. They all match. The comforter on my bed is pink, green, and white, and it is made by Polo Ralph Lauren. It describes the girly side of me. Before I had a queen size bed, I had a twin size bed. It was really small. I

enjoy my much larger bed now. My nightstand comes in handy for storing my midnight snack and drink. The two dressers give me more space to hold my massive collection of t-shirts.

My favorite thing about my bedroom is the decorations. I have many paintings in my room. The one I like the most is the collage painting. It has all the activities that I participate in such as, running, hunting, church, family, and friends. There are some tips on how to separate rubbish at home. The most simple way to separate your rubbish is by categorizing them into two types. First, you can collect organic rubbish. Examples of organic rubbish are food scrap, leaves, plants and soil. They can go into the composter. They are good to use as fertilizer. Second, you should collect non-organic rubbish. The materials that belong in this category are paper, plastic, cardboard, metal and fabric. Before we throw them into the recycle bin, we should clean them.
